

## Volcano Hazard Zones

- |  |   |
|--|---|
|  <b>Near-volcano:</b> lava and pyroclastic flows, thick tephra, lahars, ballistic ejecta, rock fall |  <b>Regional lava flows:</b> lava flows from vents dispersed between major volcanoes |
|  <b>Lahars (volcanic mudflows):</b> potentially far-travelled in valleys draining volcano           | <b>Volcanic ash (not shown):</b> fine fragments of volcanic rock carried downwind   |
